Maintenance & Notice

Clean & Maintenance

Please clean the diffuser per week as follows:

- Unplug the diffuser and pour out the remaining water from 'DRAIN SIDE'.
- Add 2-3 drops of vinegar to 100ML warm water (up to 70 °C).
- Leave diffuser for 5 minutes and gently shake and pour out water.
- Wipe the diffuser with a dry soft cloth.
- If the diffuser will not be used for a long time, please keep it clean and dry.

Notice

- Pour out the water inside the tank from the drainage outlet.
- When filling water, do not exceed the max line marked on water tank.
- Please power off diffuser first before adding water.
- Diffuser will beep two times and turn off automatically when water used up.
- Please use pure natural essential oils.
- If the diffuser is leaking for any reason, please unplug the unit and pour out remaining water. Shake diffuser gently to drain water inside, then dry for more than 24 hours.

Troubleshooting

Please refer to the table below in the event of the product operating abnormally

Will not switch on/off	· Is there enough water in the tank? Please add water to the tank. · Is the power cord connected properly? Please disconnect, check cables and reconnect carefully.
No mist or abnormal mist	· Not enough water or too much water? Please add suitable amount of water in the tank, water must never be filled over max line. · Dirt on the ultrasonic plate? Please refer the maintenance instructions remove and re-install correctly. · Dirt or dust in the air intake on the underside of the base? There is a fan on the underside of the base that is required to blow the mist out. If it gets clogged with dust or dirt, it will prevent mist from coming out.
Water leakage from product	· Cover not set on the base properly? Remove the cover and set it back on the base right above the buttons. · Low temperature or high humidity? Under these conditions, the mist may condense quickly into water droplets.

72h Clean the water tank every 3 days

- Be aware that high humidity levels may encourage the growth of biological organisms in the environment.
- Do not permit the area around the humidifier to become damp or wet. If dampness occurs, turn the output of the oil diffuser down. If the oil diffuser output volume cannot be turned down, use the oil diffuser intermittently. Do not allow absorbent materials, such as carpeting, curtains, drapes, or tablecloths, to become damp.
- Unplug the appliance during filling and cleaning.
- Never leave water in the reservoir when the appliance is not in use.
- Empty and clean the oil diffuser before storage. Clean the oil diffuser before next use.

Warning: Micro-organisms that may be present in the water or in the environment where the appliance is used or stored, can grow in the water reservoir and be blown in the air causing very serious health risks when the water is not renewed and the tank is not cleaned properly every 3 days.
