CAUTION: THE CUTTING TOOLS HAVE VERY SHARP EDGES.

To avoid injury when unpacking the parts, please follow these instructions.

1. Place the box on a low table or on the floor next to the kitchen counter where you intend to keep the food processor. Be sure the box is right side up.
2. Open top flaps – there will be a rectangular block of packing material that holds the processor parts, each fitted into a cavity.
3. Remove the instruction/recipe book and spatula.
4. Lift out the packing material.
5. Remove the base, the 13- and 4.5-cup work bowls, and place the base on the counter or table. Assemble the work bowls on the base by placing them over the shaft, using the handle to turn the work bowl clockwise to lock it.
6. Always read the Assembly Instructions thoroughly before using your food processor.
7. When ready to use your machine, unlock the accessory storage case, lift the cover and remove the clamshell to access the

small metal chopping/mixing blade, Dough Blade, large metal chopping/mixing blade, Stem Adapter, Adjustable Slicing Disc, and Reversible Shredding Disc. Each is in a cavity. **CAREFULLY REMOVE THE METAL CHOPPING/MIXING BLADE BY GRASPING THE CENTER HUB AND LIFTING IT STRAIGHT UP. NEVER TOUCH THE BLADES, AS THEY ARE RAZOR SHARP. CAREFULLY REMOVE THE ADJUSTABLE SLICING DISC BY USING THE PLASTIC HUB. DO NOT TOUCH THE BLADE; IT IS VERY SHARP.**

Remember to lock the parts in the storage case when not in use.

8. To use the dicing kit, turn the flat cover counterclockwise to open, remove the clamshell to access the dicing cutting disc, Dicing Grid supporter and Cleaning Tool. **CAREFULLY REMOVE THE DICING CUTTING DISC BY USING THE PLASTIC HUB. DO NOT TOUCH THE BLADE; IT IS VERY SHARP.**
9. The spiralizer pusher, and ribbon and spaghetti discs set are located at the side. Remove the clamshell to access the discs. We suggest you keep the clamshell for better protection and storage of the accessories. **CAREFULLY REMOVE THE RIBBON AND SPAGHETTI DISCS BY GRASPING THE HOLES ON EACH DISC. DO NOT TOUCH THE BLADE; THEY ARE VERY SHARP.**
10. Save the shipping cartons and cardboard insert blocks. You will find them very useful if you need to repack the processor for moving or other shipment. **NOTE:** We recommend that you visit our website, www.cuisinart.com for a fast, efficient way to complete your product registration.

IMPORTANT SAFEGUARDS

Always follow these safety precautions when using this appliance.

Getting Ready

1. Read all instructions.
2. **Blades and discs are sharp.** Handle them carefully.
3. **Always unplug from outlet when not in use, before putting on or taking off parts, before removing food and before cleaning. To unplug, grasp plug and pull from electrical outlet. Never pull cord.**
4. Do not use outdoors.
5. Do not let cord hang over edge of table or counter, or touch hot surfaces.
6. Do not operate any appliance with a damaged cord or plug, or after appliance has been dropped or damaged in any way. Return appliance to the nearest authorized service facility for examination, repair or electrical or mechanical adjustment.

Operation

1. Keep hands as well as spatulas and other utensils away from moving blades or discs while processing food to prevent the possibility of severe personal injury or damage to food processor. A plastic spatula may be used, but only when the food processor motor is stopped.
2. Avoid coming into contact with moving parts. Never push food down by hand when slicing or shredding. Always use pusher.
3. Make sure motor has completely stopped before removing cover. (If machine does not stop within 4 seconds after being turned off, call 1-800-762-0190 for assistance. Do not use the machine.)
4. Never store any blade or disc on motor shaft. To reduce the risk of injury, no blade or disc should be placed on the shaft except when the bowl is properly locked in place and the processor is in use. Store blades and discs out of reach of children.
5. Be sure cover and feed tube are securely locked in place before operating food processor.
6. Never try to override or tamper with cover interlock mechanism.

Cleaning

1. To protect against risk of electrical shock, do not put base in water or other liquids.

General

1. This appliance should not be used by or near children or individuals with certain disabilities.
2. Do not operate this, or any other motor-driven appliance, while under the influence of alcohol or other substances that affect your reaction time or perception.
3. This food processor is ETL listed for household use. Use it only for food preparation as described in the accompanying recipe and instruction book. Do not use this appliance for anything but its intended use.
4. The use of attachments not recommended or sold by Cuisinart may cause fire, electrical shock or personal injury, or damage to your food processor.
5. To avoid possible malfunction of work bowl switch, never store processor with cover assembly in locked position.
6. Maximum rating of 550 watts is based on Shredding Disc, which the draws greatest current. Other recommended attachments may draw significantly less current.
7. Do not operate your appliance in an appliance garage or under a wall cabinet. **When storing in an appliance garage, always unplug the unit from the electrical outlet.** Not doing so could create a risk of fire, especially if the appliance touches the walls of the garage or the door touches the unit as it closes.
NOTICE: This appliance has a plastic case, it has a polarized plug (one blade is wider than the other). As a safety feature, this plug will fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Do not attempt to defeat this safety feature.

GENERAL ASSEMBLY INSTRUCTIONS

Before First Use

Before using your Cuisinart® Elemental™ 13-Cup Food Processor for the first time, wash all the parts (see Cleaning, Storage and Maintenance Instructions on page 15).

1. Place the food processor base on a dry, level countertop with the controls facing toward you. Do not plug the unit in until it is fully assembled.

Note: To use the Small Bowl, it must be nested in the Large Work Bowl with the Stem Adapter in place for operation.

2. Place the Large Work Bowl on the base and use the handle to turn the bowl counterclockwise to lock it into place.
3. To use the Small Work Bowl, first attach the Large Work Bowl to the base. Place the Stem Adapter onto the shaft, then lower the Small Work Bowl over the adapter and into the Large Work Bowl. Place your fingers in the recesses of the Small Work Bowl and turn slightly to secure in place.

Main Work Bowl Cover Operation

1. Place the cover over the large work bowl with the feed-tube assembly shifted slightly to the right of the handle.
2. Once the cover is fully seated, rotate the cover to the left (clockwise) to engage the lid-locking mechanism and interlock.
3. To remove the cover, rotate the cover approximately $\frac{1}{12}$ th of a turn to the right to disengage the interlock and locking mechanism.

Flat Work Bowl Cover Operation

Use the Flat Cover for added convenience when your recipe calls for chopping, mixing, puréeing or kneading. It is particularly useful when you are preparing baked goods such as cakes, cookies, pies and breads.

To Assemble the Flat Cover

Begin with the work bowl and the metal blade in place. Place the Flat Cover on the work bowl so that the **Cuisinart logo written on the cover** is face up and readable. Then turn cover **CLOCKWISE** to lock into place.

Make sure the small cap is in place before using.

To Disassemble the Flat Cover

Place one hand near the Cuisinart logo and one hand on opposite end of cover; turn cover **COUNTERCLOCKWISE**. Lift cover up and off work bowl. Do not use the Flat Cover with the Slicing Disc, Shredding Disc, Dicing or Spiralizer attachments. Use only with the metal blade or Dough Blade.

Work Bowls

The two nested work bowls offer versatile food processing options and save you time by minimizing cleanup. Use only the Small Work Bowl when processing smaller quantities. Optimize efficiency when making recipes that require multiple bowls by starting with the Smaller Work Bowl. For example, prepare a crumb topping before mixing batter for a cake in the Large Work Bowl. Or emulsify dressing before shredding vegetables for vegetable slaw.

Chopping certain foods may scratch or cloud the work bowl; this will not affect the functionality of your work bowl.

Machine Controls

High and Low Control Buttons

The High and Low controls are buttons that allow the machine to run until Off is selected.

1. Properly assemble the machine.
2. Add ingredients to the work bowl, either through the feed tube or directly into the bowl. Lock cover into place.
3. Press the High or Low button. The motor will start.
4. Press the Off button when finished.

Pulse Button

The Pulse control is a button that allows the machine to run only while it is being pressed. This capability provides more accurate control of the duration and frequency of processing. Unless otherwise specified, a pulse should be about two seconds.

With the machine properly assembled and engaged, and ingredients in the work bowl, press the Pulse button repeatedly as needed.

CHOPPING/ MIXING BLADES

Blade Operation

The BladeLock feature is designed to keep the blade in place during processing, pouring, lifting, and handling tasks — but is not permanently attached. **Handle with care. Always check to be sure the blade is securely locked before turning the bowl upside down.**

Large Blade Operation

With your Large Work Bowl assembled on the base, grasp the Large Chopping/Mixing Blade by its hub, align it over the center of the bowl, place it onto the shaft and push down until it locks into place. Always check to be sure the blade is securely locked before turning the bowl upside down. (To remove, first take the bowl off the base and put it on a flat surface. Rest the heel of your hand on the rim of the bowl and pull up gently and carefully.)

Small Blade Operation

With the Large Work Bowl in place on the base, place the Stem Adapter onto the hub in the center of the bowl. Next, put the Small Work Bowl into the Large Work Bowl, positioning it over the Adapter. Grasp the Small Chopping/Mixing Blade by its hub, placing it on the Stem Adapter. Push down firmly to lock. (To remove, first take the bowl off the base and put it on a flat surface. Rest the heel of your hand on the rim of the bowl and pull up gently and carefully.)

Chopping (using the Chopping/Mixing Blade)

- For raw ingredients: Peel, core and/or remove seeds and pits. Food should be cut into even, ½- to 1-inch pieces. Foods cut into same size pieces produce the most even results.
- Pulse food in 1- to 2- second increments to chop. For the finest chop, either hold the Pulse button down or press High or Low to run the

machine continuously. Watch ingredients closely to achieve desired consistency and scrape the work bowl as necessary. High speed is recommended for most chopping, processing and slicing/shredding tasks.

Puréeing

(using the Chopping/Mixing Blade)

- To purée fresh fruits or cooked fruits/vegetables: Ingredients should be cut into 1-inch pieces; a smooth purée is best achieved when all the pieces are equal in size. Pulse to initially chop and then process on High or Low until food is puréed; scrape the work bowl as necessary. Do not use this method to purée cooked white potatoes.
- To purée solids for a soup or sauce: Strain the solids from the liquid and process the solids alone. Add cooking liquid through the feed tube and process as needed.

SLICING/SHREDDING DISCS

Disc Operation

When using the Large Work Bowl, position the Stem Adapter onto the shaft. If using the Adjustable Slicing Disc, use the rotating hub and indicator markings to select slicing thickness. Using the plastic hub, align and insert the disc over the Stem Adapter.

If using the Reversible Shredding Disc, determine whether the fine or medium side will be used, and use the plastic hub to twist into position on the Stem Adapter. The plastic hub may be used for removal of this disc.

Using the Adjustable Slicing and Reversible Shredding Discs

- The Slicing Disc makes whole slices. It slices fruits, vegetables and cooked meat.
 - The Shredding Disc shreds most firm and hard cheeses. It also shreds vegetables like potatoes, carrots and zucchini.
 - Always pack food in the feed tube evenly for slicing and shredding. The food will dictate the amount of pressure: Use light pressure for
- 

- soft foods, medium pressure for medium foods and firm pressure for harder foods. Always process with even pressure.
- For round fruits or vegetables, slice a thick piece off base so it sits upright in feed tube. Slice to fit tube if necessary.
 - For small ingredients like mushrooms, radishes or strawberries: Trim the ends so the food sits upright in the feed tube.
 - When slicing or shredding cheese, be sure that it is well chilled.
 - To shred leafy vegetables like lettuce or spinach: Roll leaves together and stand them up in feed tube. Process with even pressure.
- NOTE: Always use the pusher when slicing or shredding. Never put your fingers in the feed tube while unit is running.**

USER GUIDE

You can slice, shred and chop a multitude of vegetables and fruits in the Cuisinart® Food Processor. What you may not know is that the food processor is the perfect tool for a number of other tasks, such as softening butter, making breadcrumbs, making baby food, etc. Here is a guide that will help you in preparing just about anything!

FOOD	TOOL	SPEED	DIRECTIONS
Soft Cheeses (ricotta, cream cheese, cottage cheese, etc.)	Chopping/Mixing Blade	Low to gently mix or High to whip	Have cheese at room temperature. When applicable, cut into 1-inch pieces. Process until smooth, stopping to scrape down the sides of the bowl as needed. Perfect for making cheesecakes, dips, pasta fillings and more.
Firm Cheeses (Cheddar, Swiss, Edam, Gouda, etc.)	Slicing or Shredding Disc	High	Cheese should be well chilled before slicing/shredding. Cut to fit feed tube. Use light to medium pressure when slicing/shredding.
Hard Cheeses (Parmesan, Romano, etc.)	Chopping/Mixing Blade Slicing or Shredding Disc	Pulse and High	If using the Chopping Blade, cut into ½-inch pieces. Pulse to break up and then process until finely grated. This will produce a nice grated cheese. If slicing or shredding, cut to fit feed tube. Use light to medium pressure when slicing/shredding.
Baby Food	Chopping/Mixing Blade	Pulse and High	As for all fruit and vegetable purées, cut ingredients into ½- to 1-inch pieces. Steam ingredients until completely soft. Pulse to chop, then process until completely smooth (add steaming liquid through the feed tube when processing if necessary). Keeps frozen in ice cube trays for individual 1-ounce portions.
Butter	Chopping/Mixing Blade Slicing or Shredding Disc	High	<i>For creaming:</i> Have butter at room temperature. Cut into 1-inch pieces. Process, scraping bowl as necessary. For compound (flavored) butters, process flavoring ingredients, such as herbs, zest, vegetables, etc., before adding butter. <i>For shredding/slicing:</i> Freeze briefly. Use light to medium pressure to shred or slice. Shredded butter is great for preparing certain pastry doughs. Sliced butter is great for serving alongside corn on the cob or freshly made rolls.
Crumbs (Bread, Cookie, Cracker, Chip)	Chopping/Mixing Blade	Pulse and High	Break into pieces. Pulse to break up, and then process until desired consistency. This will make perfect bread/cracker/chip crumbs for coating meats and fish. Processed cookies make delicious pie and cake crusts.
Fresh Herbs	Chopping/Mixing Blade	Pulse	Wash and dry herbs thoroughly. Pulse to roughly chop. Continue pulsing until desired consistency is achieved.

FOOD	TOOL	SPEED	DIRECTIONS
Ground Meat	Chopping/Mixing Blade	Pulse	Cut meat into 1-inch pieces. Pulse to chop, about 25 long pulses, or until desired consistency is achieved. If a purée is desired, continue to process. Never chop/purée more than 2 pounds at one time. Make sure to never process meat containing bones.
“Ice Cream”	Chopping/Mixing Blade	Pulse and High	Put frozen fruit cut into 1-inch pieces into the work bowl with liquid (juice or milk), any desired sweeteners, such as sugar, honey, simple syrup and other flavors. Pulse to break up. Process until smooth.
Milk Shakes/ Smoothies	Chopping/Mixing Blade	Low	For milk shakes, first add ice cream. While unit is running, add milk through the feed tube until desired consistency is achieved. For smoothies, add fruit first, then add the liquid through the feed tube while unit is running.
Nuts	Chopping/Mixing Blade	Pulse and High	Pulse to chop to desired consistency. To make a nut butter, pulse to break up, and then process until smooth, stopping to scrape down as needed.
Superfine Sugar	Chopping/Mixing Blade	High	Process granulated sugar for about 1 minute until finely ground. Excellent for using in meringues and other baked goods.
Whipped Cream	Chopping/Mixing Blade	Low	Process well-chilled cream until cream begins to thicken. Add sugar as desired; process continuously until cream reaches desired consistency. This cream is dense and perfect as a whipped topping for cake or ice cream.

Dough Blade

Dough Blade Operation

For use with the Large Work Bowl. Carefully place the Dough Blade on the shaft and push into place.

Kneading

(using the Dough Blade or the Chopping/ Mixing Blade with Low Speed)

- The Chopping Blade is ideal for pastry doughs, while the Dough Blade is specifically designed for kneading yeast doughs.

- The Large Pusher Lock is recommended to be in the locked position when kneading dough to avoid it from moving around — some vibration is still normal.
- Dough kneading should be done in the Large Work Bowl only.

Large Work Bowl
& Accessories

DICING

Assembling the Dicer in Work Bowl

1. With Large Work Bowl on base, insert Stem Adapter.
2. Carefully place Dicing Grid onto the Stem Adapter with the Grid positioned closest to the front of the food processor. Be sure “This Side Up” shows on top. The triangle on front of the Grid should be aligned with the center of the work bowl handle. Dicer will not work if inserted incorrectly.

3. Carefully place Dicing Disc on top of Grid. Push down slightly to lock into place. It should not move if positioned accurately.
NOTE: Always use caution when handling the Dicing Disc; they are very sharp.
4. Follow instructions under Main Work Bowl Cover Operation to lock cover onto work bowl.

Using Dicing Kit

- The Dicing Disc and Grid make cubed pieces of fruit and vegetables. The recommended speed for dicing most fruits and vegetables is High. Use Low speed when dealing with very soft items such as kiwi.
- When dicing, only use the **medium** or **small** feed tube. Be sure to pack single items tightly, to the left of the feed tube using consistent downward pressure.
- **Use the Cleaning Tool to clear the Grid.** First dislodge jammed particles using the long single tooth on the handle. Then align the two long pins along the right and left of the Grid. Guide the cleaner into the correct position and press down to clear the Grid of food residue.
- When processing items like carrots, squash and potatoes, clean the Grid every 3 to 4 times to prevent buildup.
- When large pieces of food remnants are lying between the Grid and Disc, use caution when cleaning off the remains by using the gaps featured to the right and left of the Grid.

NOTE:

We do not recommend dicing frozen foods and meats.

For dicing, use Medium or Small Pusher only.

TIP:

Always process foods from soft (kiwi) to hard (potato).

Dicing Kit & Accessories

Soft/Very Ripe Vegetables (e.g., Ripe Tomatoes and Avocados)	Dicing Kit	Low	Peel vegetables if necessary, and trim to fit small or medium feed tube before dicing.
Most Fruits (e.g., Apples, Bananas, Strawberries)	Dicing Kit	High	Peel fruit if necessary, and trim to fit small or medium feed tube before dicing.
Soft/Very Ripe Fruits (e.g., Kiwi, Ripe Pineapple, Very Ripe Bananas)	Dicing Kit	Low	Peel fruit if necessary, and trim to fit small or medium feed tube before dicing.

SPIRALIZER

Operating the Spiralizer

1. With Large Work Bowl on base, insert Stem Adapter.
2. Place the Spiralizer Disc holder over the Stem Adapter and secure into place.
3. Fit the desired disc onto the Spiralizer Disc Holder. Insert your fingers into the finger holes and turn disc clockwise to lock into place.
4. Lock the cover into place.

Spiralizer Tips

- The Spiralizer attachment uses two discs – a Spaghetti Cut Disc and a Ribbon Cut Disc—to create garnishes or cut slices of vegetables and fruits in wide or narrow spirals.
- Use the Spaghetti Cut Disc to cut long, thin ribbon slices. Use the Ribbon Cut Disc for wider slices.
- Once the desired amount of spiralized fruit or vegetable accumulates in the work bowl, turn the food processor off, remove the lid, and remove the food.

5. Trim the fruit or vegetable to fit the Feed Tube. Trim the top and bottom to form a flat surface on both sides. Put the item into the Feed Tube, centering it onto the corer (middle pin).
6. Using the Pusher, push down item to secure firmly onto the pusher's teeth.
7. Select High or Low to spiralize item. Select Off to stop spiralizing and remove lid. Remove scraps remaining on cutting disc. Remove scraps on Pusher. Replace lid and repeat with next item.

- For best results, use firm fruits and vegetables and process on High speed (see chart for suggestions).
- Be sure to clean the entire unit after each usage. All pieces are dishwasher safe
- Attach shorter foods such as radishes by pressing the Pusher's teeth onto the food, then place into Feed Tube for a more secure hold.

CLEANING, STORAGE AND MAINTENANCE

- Keep your Cuisinart® Elemental™ 13-Cup Food Processor ready to use on the kitchen counter. When not in use, leave it unplugged.
- Keep the blades and discs out of reach of children.
- All parts except the housing base are dishwasher safe, and we recommend washing them in the dishwasher on the **top rack only**. Due to intense water heat, washing the work bowls, cover and accessories on the bottom rack may cause damage over time. Insert the cover with the feed tube facing up to ensure proper cleaning. Insert the work bowls and pusher upside down for drainage. Remember to unload the dishwasher carefully wherever you have placed sharp blades and discs.
- To simplify cleaning, rinse the work bowls, cover, pusher and blades or discs immediately after use so food won't dry on them. Be sure to position the pusher upside down for drainage. If food lodges in the pusher, remove it by running water through it, or use a bottle brush.
- If you wash the blades, discs, dicing and spiral accessories by hand, do it carefully. When handling, use the plastic hubs. Avoid leaving them in soapy water where they may disappear from sight. To clean the blades, fill the work bowl with soapy water, hold the blade by its plastic center and move it rapidly up and down on the center shaft of the bowl. Use of a spray attachment is also effective. If necessary, use a brush.

- The work bowls are made of SAN plastic with metal components. They should not be placed in a microwave oven.
- The housing base may be wiped clean with a soapy, nonabrasive material. Be sure to dry it thoroughly.
- If the feet leave spots on the counter, spray them with a spot remover and wipe with a damp sponge.
- If any trace of the spot remains, repeat the procedure and wipe the area with a damp sponge and nonabrasive cleaning powder.

IMPORTANT: Never store any blade or disc on the motor shaft. No blade or disc should be placed on the shaft except when the processor is about to be used.

MAINTENANCE: Any other servicing should be performed by an authorized service representative.

FOR YOUR SAFETY

- Like all powerful electrical appliances, a food processor should be handled with care. Follow these guidelines to protect yourself and your family from misuse that could cause injury.
- Handle and store blades and discs carefully. Their cutting edges are very sharp.
- Never put blades or discs on the motor shaft until the work bowl is locked in place.
- Always be sure that the blade or disc is down on the motor shaft as far as it will go.
- Always insert the blade in the work bowl before putting ingredients in bowl.
- When slicing, shredding, dicing or spiralizing

food, always use the pusher. Never put your fingers or spatula into feed tube.

- Always wait for the blade or disc to stop spinning before you remove the pusher assembly or cover from the work bowl.
- Always unplug the unit before removing food, cleaning or putting on or taking off parts.
- Always remove work bowl from base of machine before you remove the blade.
- Be careful to prevent the chopping/mixing blade from falling out of the work bowl when emptying the bowl. Remove it before tilting the work bowl.

TECHNICAL DATA

The motor in your food processor operates on a standard line operating current. The appropriate voltage and frequency for your machine are shown on a label on the bottom of the base.

An automatic, temperature-controlled circuit breaker in the motor ensures complete protection against motor burnout. If the processor runs for an exceptionally long time when chopping, mixing or kneading a thick or heavy mixture in successive batches, the motor may overheat. If this happens, the processor will stop. Turn it off and wait for the motor to cool before proceeding. It will usually cool within 10 minutes. In extreme cases, it could take an hour.

Safety switches prevent the machine from operating when the work bowl or the cover is not locked into position. The motor stops within seconds when the motor is turned off; and when the pusher assembly is removed, a fast-stop circuit also enables the motor to stop within seconds.

Cuisinart offers a Limited Three-Year Warranty on the entire machine.

TROUBLESHOOTING

Food Processing

- 1. Problem:** The food is unevenly processed when chopping.

Solution:

- The ingredients should be cut evenly into ½- to 1-inch pieces before processing.
- Process in batches to avoid overloading.

- 2. Problem:** Slices are uneven or slanted.

Solution:

- Place evenly cut food, cut side down, into the feed tube. Pack if possible. Always use the smallest feed tube possible.
- Apply even pressure on the pusher.

- 3. Problem:** Food falls over in feed tube.

Solution:

- Feed tube should be packed full for best results.

- 4. Problem:** Some food remains on top of the disc.

Solution:

- It is normal for small pieces to remain; cut remaining bits by hand and add to processed ingredients.

Spiralizer

- 1. Problem:** No room for ribbon stacks to fall.

Solution:

- Turn the food processor Off, remove the lid, and transfer the food to a separate bowl before continuing.

- 2. Problem:** Spaghetti cuts wrap around stem.

Solution:

- Turn the food processor Off, remove the lid, and transfer the food to a separate bowl before continuing.

- 3. Problem:** Food is not spiralizing.

Solution:

- Remove food from Feed Tube, remove scraps from Disc and Pusher and retrim edges of food to form a new, flat surface.

- 4. Problem:** Spaghetti cuts are not clean cut.

Solution:

- Rinse Disc and make sure it is free of any scraps.

Dicing Kit

- 1. Problem:** Food is stuck in the Grid.

Solution:

- First, unplug unit. Carefully remove Dicing Disc.
- Use the long, single tooth on the Cleaning Tool handle to push stubborn food through Grid and large openings.
- Then, carefully reach into the large openings on either side of Grid to remove large food pieces.
- Do not use your fingers to clean the Grid. **ONLY USE THE CLEANING TOOL.**

- 2. Problem:** Pieces of food are not evenly cut.

Solution:

- Pack items closest to the left in medium or small feed tube.
- Use the small feed tube for smaller items.
- Apply even pressure when using feed tube.

Dough Kneading

1. Problem: Motor slows down.

Solution:

- Amount of dough may exceed maximum capacity of your food processor. Remove half and process in two batches.
- Dough may be too wet (see number 8). If motor speeds up, continue processing. If not, add more flour, 1 tablespoon at a time, until the motor speeds up. Process until dough cleans the sides of the work bowl.

2. Problem: Blade doesn't incorporate ingredients.

Solution:

- Always start the food processor before adding liquid. Add liquid in a slow, steady stream, or through the drizzle hole in the pusher, allowing the dry ingredients time to absorb it. If liquid is added too quickly, wait until ingredients in the work bowl have mixed, then add remaining liquid slowly (do not turn off the machine). Pour liquid onto dough as it passes under feed tube opening; do not pour liquid directly onto bottom of the work bowl.

3. Problem: Blade rises in work bowl.

Solution:

- Excessively sticky dough can cause blade to rise. Carefully reinsert blade and immediately add 2 tablespoons of flour through the feed tube while the machine is running.

4. Problem: Dough doesn't clean inside of the work bowl.

Solution:

- Amount of dough may exceed maximum capacity of your food processor. Remove half and process in two batches.
- Dough may be too dry (see number 7).
- Dough may be too wet (see number 8).

5. Problem: Nub of dough forms on top of blade and does not become uniformly kneaded.

Solution:

- Stop machine, carefully remove dough, divide it into 3 pieces and redistribute them evenly in the work bowl.

6. Problem: Dough feels tough after kneading.

Solution:

- Divide dough into 2 or 3 pieces and redistribute evenly in bowl. Process 10 seconds or until uniformly soft and pliable.

7. Problem: Dough is too dry.

Solution:

- While machine is running, add water, 1 tablespoon at a time, until dough cleans the inside of the bowl.

8. Problem: Dough is too wet.

Solution:

- While machine is running, add flour, 1 tablespoon at a time, until dough cleans the inside of the bowl.

Technical

1. Problem: The motor does not start.

Solution:

- There is a safety interlock to prevent the motor from starting if it is not properly assembled. Make sure the work bowl and work bowl cover are securely locked into position.
- If the motor still will not start, check the power cord and outlet.

2. Problem: The food processor shuts off during operation.

Solution:

- The cover may have become unlocked; check to make sure it is securely in position.
- A safety protector in the motor prevents the motor from overheating, which is caused by excessive strain. Press the Off control button and wait 10 minutes to allow the food processor to cool off before resuming.

3. Problem: The motor slowed down during operation.

Solution:

- This is normal as some heavier loads (e.g., slicing/shredding cheese) may require the motor to work harder. Simply reposition the food in the feed tube and try again.
- The maximum load capacity may have been exceeded. Remove some of the ingredients and continue processing.

4. Problem: The food processor vibrated/moved around the countertop during processing.

Solution:

- Make sure the rubber feet at the bottom of the unit are clean and dry. Also make sure that the maximum load capacity is not being exceeded.
- This is normal as some heavier loads (e.g., slicing/shredding cheese) may require the motor to work harder.

There is no need to buy breadcrumbs when you can make them fresh in your Cuisinart® Food Processor.

8

SLICES WHITE BREAD

Makes about 2 cups

1. Preheat oven to 325°F. Arrange the bread on a sheet tray in a single layer. Bake until golden in color and completely dried out, about 20 minutes.

SIMPLE PIZZA AND TOMATO SAUCE

The difference between pizza sauce and tomato sauce is that pizza sauce does not need to be cooked—it cooks on the pizza in the oven, while tomato sauce simmers on the stove.

- 2 CANS (28 OUNCES EACH)
WHOLE, PEELED TOMATOES
- 2 TABLESPOONS EXTRA VIRGIN
OLIVE OIL
- 2 LARGE GARLIC CLOVES, PEELED
- 10–15 FRESH BASIL LEAVES

Tomato Sauce:

1. Put tomatoes into the Large Work Bowl fitted with the Large Chopping Blade. Process on High until smooth, about 1 minute. Reserve.
2. Put olive oil in a medium saucepan over medium heat. When oil is hot, add garlic and cook until lightly golden and fragrant, 2 to 3 minutes. Add puréed tomatoes, cover and reduce heat to simmer, stirring frequently, until sauce is reduced slightly until thickened, about 15 minutes.
3. Tear up basil and add to sauce; cook for 2 minutes. Add salt, taste and adjust seasoning as desired. Remove garlic cloves before serving.

MAKES ABOUT ¾ CUP

- 1 SMALL GARLIC CLOVE, PEELED
- 3 CUPS PACKED, FRESH BASIL LEAVES
- 1¼ TEASPOONS KOSHER SALT
- ¼ TEASPOON FRESHLY GROUND BLACK PEPPER
- ½–¾ CUP EXTRA VIRGIN OLIVE OIL

Makes about 14 cups

1. Prepare all ingredients before beginning recipe. Using the Slicing Disc first, slice the leek and celery on setting 5. Reserve together. Adjust Slicing Disc to setting 7. Slice green beans. Reserve.
2. Replace the disc with the Dicing Grid and Disc. Dice zucchini and yellow squash. Reserve together. Dice fennel and carrots. Reserve together. Have potatoes ready to dice.
3. Put olive oil in a large stockpot over medium heat. Once the oil is hot, add the reserved leek, celery, carrots, fennel with the garlic, ¼ teaspoon of salt and a pinch of the pepper. Sweat until vegetables are slightly soft, about 10 minutes.
4. While the vegetables are sweating, dice the potatoes. Stir into the pot along with the green beans and the remaining salt and pepper. Stir well.
5. Add the broth and Parmesan rind. Increase the heat and bring the liquid to a boil. Add the zucchini, squash, chickpeas and beans. Reduce heat to maintain a simmer until all the vegetables are tender, about 20 to 30 minutes. If using the ditalini, stir in during the last 5 to 10 minutes to heat through.
6. While soup is simmering, prepare the pesto in the Small Work Bowl fitted with the Small Chopping Blade: With the food processor running on High, drop the garlic through the small feed tube to finely chop. Scrape down the bowl and add basil, salt and pepper. Pulse to roughly chop, about 5 to 6 times. Run food processor on High and drizzle in oil through the small feed tube. Process until combined, about 1 minute.
7. Once the soup has simmered and all vegetables are tender, taste and adjust seasoning as desired.
8. Serve in individual bowls topped with a dollop of pesto. Pesto is best stirred into soup just before eating.

*Our Pizza Dough recipe on page 71 can also be used. Unlike the cauliflower crust, it does not need to be prebaked first. To make: On a lightly dusted surface, roll out pizza dough into a 12-inch circle. Transfer pizza dough to a pizza screen sprayed with nonstick cooking spray or a baking sheet dusted very well with cornmeal. Top with sauce and toppings, brush edges of crust with olive oil and bake until crust is golden brown, toppings are soft and cheese is melted and bubbly.

SAUSAGE ROLLS

The taste of homemade sausage surpasses the taste of prepackaged and is very easy to make in the Cuisinart® Food Processor. Cook it “loose” on the stovetop to add to any pasta or sauce dish, or make New York City-style sausage rolls using pizza dough and sauce like we do here.

- 1 POUND PORK SHOULDER, TRIMMED OF ANY EXCESS FAT AND CUT INTO 1-INCH PIECES
- 1 TEASPOON FENNEL SEEDS
- 1 GARLIC CLOVE, PEELED
- 1½ TEASPOONS KOSHER SALT
- ½ TEASPOON FRESHLY GROUND BLACK PEPPER
- ¼ TEASPOON GRANULATED SUGAR
- UNBLEACHED ALL-PURPOSE FLOUR, FOR DUSTING
- 1 RECIPE PIZZA DOUGH, PAGE 71
- 2 CUPS SHREDDED MOZZARELLA CHEESE
- 1 CUP PREPARED PIZZA SAUCE (OR USE RECIPE ON PAGE 27)

Makes four, 7-inch rolls

1. Put pork pieces into the freezer for 30 minutes to slightly harden. While pork is in the freezer, toast fennel seeds in a pan over medium heat. Reserve.
2. Insert the Large Chopping Blade into the Large Work Bowl. With the food processor running on High, drop the garlic through the small feed tube to finely chop. When the pork shoulder cubes are sufficiently cold, put them into the Large Work Bowl with the chopped garlic. Add the toasted fennel seeds, salt, pepper and sugar. Pulse to coarsely chop, about 15 to 20 times.
3. In a large skillet set over medium-high heat, cook chopped pork until completely browned. With a slotted spoon, transfer to a plate lined with a paper towel to drain and cool. Preheat oven to 425°F.
4. While sausage is cooling and oven is heating, lightly dust a work surface with flour. Roll the prepared pizza dough into an 18-inch circle. Divide into four equal pieces.
5. Take one piece of dough and place it in front of you with the point facing away from you. Put ½ cup of the shredded mozzarella into the center of each piece of dough and arrange into a horizontal line. Distribute the meat evenly on top of each cheese pile. Top each with ¼ cup of pizza sauce.
6. Close roll by folding the long bottom part of the dough loosely over the mixture, then fold the tip over the folded dough and tuck under roll. The sides of the sausage roll will be exposed. Repeat with each of the pieces of dough.
7. Put the rolls on a baking sheet lined with foil and bake in the lower part of the oven until dough is golden brown, about 20 to 25 minutes.

- ⅓** CUP WARM WATER
(105°F TO 110°F)
- 4** CUPS UNBLEACHED,

4. Transfer dough to a large bowl lightly dusted with flour. Cover with plastic wrap and allow to rise in a warm place until doubled, about 1 to 1½ hours.
5. After the dough has doubled in size, lightly coat two, 9-inch loaf pans with nonstick cooking spray. Reserve. Punch down dough and divide into two equal pieces. Form into 2 loaves and transfer to the prepared loaf pans. Cover with plastic wrap coated with the nonstick cooking spray. Allow to rise until dough is just above the tops of the pans, about 45 minutes to 1 hour.
6. Preheat oven to 400°F. Bake until tops are browned and loaf sounds hollow when tapped, about 30 to 35 minutes. Remove from pans and cool on wire rack. Cool completely before slicing.
