Explanation of symbols

WARNING!

Safety instruction: Indicates a hazardous situation that, if not avoided, could result in death or serious injury.

CAUTION!

Safety instruction: Indicates a hazardous situation that, if not avoided, could result in minor or moderate injury.

NOTICE!

Indicates a situation that, if not avoided, can result in property damage.

NOTE

Supplementary information for operating the product.

Safety Instructions

WARNING! Failure to obey these warnings could result in death or serious injury.

Electrocution hazard

- Do not operate the electric air pump if it is visibly damaged.
- If this electric air pump's power cable is damaged, it must be replaced by the manufacturer, a service agent or a similarly qualified person in order to prevent safety hazards.
- This electric air pump may only be repaired by qualified personnel. Improper repairs can lead to considerable hazards.
- Do not use the electric air pump in wet conditions or submerge in any liquid. Store in a dry place.

CAUTION! Failure to obey these cautions could result in minor or moderate injury.

Electrocution hazard

- Before starting the electric air pump, ensure that the power cable and the plug are dry and the plug is free of rust or foreign matter.
- Disconnect the electric air pump from the power supply
 - before each cleaning and maintenance
 - after every use

Risk of injury

- This device is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the device by a person responsible for their safety.
- Keep children and pets away from the electric air pump whilst operation.
- Do not direct air stream at face or body.
- Observe the recommended air pressure.
- Cleaning and user maintenance may not be carried out by unsupervised children.

NOTICE! Damage hazard

- Check that the voltage specification on the data plate corresponds to that of the energy supply.

- Do not place the device near naked flames or other heat sources (heaters, direct sunlight, gas ovens etc.).
- Do not let the device operate unattended.
- Never pull the plug out of the socket by the cable.

Scope of delivery

Component	Quantity
Electric air pump	1
Air hose	1
Nozzle adapter	6

Intended use

The electric air pump is intended to be used for inflatables such as awning tents and tents. The electric air pump is designed to be operated from a DC power supply socket of a vehicle.

This product is only suitable for the intended purpose and application in accordance with these instructions.

This manual provides information that is necessary for proper installation and/or operation of the product. Poor installation and/or improper operating or maintenance will result in unsatisfactory performance and a possible failure.

The manufacturer accepts no liability for any injury or damage to the product resulting from:

- Incorrect assembly or connection, including excess voltage
- Incorrect maintenance or use of spare parts other than original spare parts provided by the manufacturer
- Alterations to the product without express permission from the manufacturer
- Use for purposes other than those described in this manual

Dometic reserves the right to change product appearance and product specifications.

Technical description

The electric air pump is equipped with a pressure induction system and switches off automatically as soon as the preset pressure is achieved. The pressure induction system operates with an error margin of ± 0.5 psi.

Using the electric air pump

NOTICE! Risk of overheating

- Make sure that the electric air pump is sufficiently ventilated during operation.
- Do not operate the electric air pump continuously for longer than 15 min as the motor may overheat. Allow the electric air pump to cool down for 30 min after 15 min of continuous use.

NOTE

- If no buttons have been pressed for 30 sec, the LCD display will go into standby mode. Press any button to reactivate.
- At first it will take time for the pressure reading on the LCD display to increase. This is normal, as a large amount of air is initially required to fill the air frame before a significant change in pressure is detected.

- Proceed as shown to use the electric air pump (fig. **1**, page 3 to fig. **10**, page 4).

Cleaning and maintenance

NOTICE! Damage hazard

- Do not attempt to put any object into the inflation port as these can damage the internal pump mechanism.
- Do not use sharp or hard objects or cleaning agents for cleaning as these may damage the product.

- ▶ Occasionally clean the product with a damp cloth.
- ▶ After each use, store the plug in the opening provided.
- ▶ When storing the device, ensure the supply cord and air hose are not trapped or kinked.

Troubleshooting

Problem	Possible reason	Solution
The electric air pump does not work. The LCD display does not illuminate.	The electric air pump does not receive any power.	<ul style="list-style-type: none"> ▶ Check that the DC plug is fully inserted into the socket. ▶ Plug in another 12 VDC device to check the correct operation of the socket.
The electric air pump does not work. The LCD display illuminates.	The electric air pump does not receive enough current from 12 V power source.	Check that the 12 V power source is rated for at least 10 A.
The pressure increases quickly.	The airflow is obstructed.	<ol style="list-style-type: none"> 1. Press the  button to turn the power off immediately. 2. Check the nozzle adapter and the inflation port for obstructions. 3. Check the air hose for kinks.

Disposal

- ▶ Place the packaging material in the appropriate recycling waste bins, wherever possible.

Consult a local recycling center or specialist dealer for details about how to dispose of the product in accordance with the applicable disposal regulations.

Warranty

The statutory warranty period applies. If the product is defective, please contact your retailer or the manufacturer's branch in your country (see dometic.com/dealer).

For repair and warranty processing, please include the following documents when you send in the product:

- A copy of the receipt with purchasing date
- A reason for the claim or description of the fault

Technical data

	Gale 12 V Pump
Voltage:	12 V DC
Delivery rate:	100 l/min \pm 10%
Operating time:	maximum 15 min
Noise emission:	32 dB
Dimensions:	280 x 200 x 90 mm
Weight:	1.79 kg
Inspection/ certification:	 

For the current EU declaration of conformity for your device please refer to the respective product page on dometic.com or contact the manufacturer directly (see dometic.com/dealer).
