

Product Name: 22-component detachable color skull

Product Model: PNT-0159

Product Dimensions: 19.5*17*21.5CM

Product Weight: 1000G

Product Material: PVC

This adult human skull model realistically reproduces complex anatomical structures, making them easy to understand and helping users master anatomical knowledge. It is widely used for medical teaching, learning, aesthetic micro-plastic training and other professional applications.

Made of **multi-colored materials** with **integral coloring** (not surface painted), this skull model **will not fade** and is highly durable. It clearly presents the complicated structure of the human skull, including sutures, foramina, processes, fissures and other anatomical details.

The model consists of **22 realistic and detailed detachable bones**: left & right parietal bones, occipital bone, frontal bone, left & right temporal bones, sphenoid bone, ethmoid bone, vomer bone, left & right zygomatic bones, left & right maxilla with teeth, left & right palatine bones, left & right nasal conchae, left & right lacrimal bones.

Handcrafted from **sturdy, shatter-resistant, eco-friendly PVC**, it is non-toxic, long-lasting and ideal for medical education, anatomy study and aesthetic training.

NOT A MEDICAL DEVICE

This product is for EDUCATIONAL & TRAINING PURPOSES ONLY. It is not intended for medical diagnosis, treatment, or clinical use.

【After-Sales Service】
