

Goldair™

# How do I stay cool this summer?

Cooling solutions made easy

A silhouette of a person standing on a cliff, looking out over a body of water at sunset. The sun is low on the horizon, creating a bright glow and reflecting on the water. The person's arms are outstretched, and they appear to be in a state of contemplation or enjoying the view.

# Goldair™

**Here at Goldair, we've  
been on a mission to  
keep Aussies cool with  
innovative and affordable  
cooling solutions for nearly  
40 years and we're not  
stopping there.**

We want to make keeping cool all summer long as simple and easy as possible, so we've created this guide getting rid of the jargon, losing the techno gobbledegook and bringing you the facts to make life easier.

So, what are the best fans to help you stay cool this summer?

Evaporative Coolers	18
Portable Air Conditioners	19

# Guide to the guide

## Room Type:

PERSONAL COMFORT

SMALL 10m<sup>2</sup>  
Small bedrooms, home offices

MEDIUM 10m<sup>2</sup> - 18m<sup>2</sup>  
Bedrooms, dining rooms  
and hallways

LARGE 18m<sup>2</sup> - 28m<sup>2</sup>  
Lounges, large bedrooms

## Fixing Type:

**F** Fixed – fans designed to fix on walls

**P** Portable – fans that can be moved  
from room to room

\*Images shown in this guide are a representation of the type of cooling technology. The range in store may differ. You can apply the room size and fixing type to all cooling models.

# Helpful Tips

Select a cooling solution that will cool your room or yourself faster and more efficiently. Be sure to turn them off when you're not in the room.

- Wear short-sleeved, loose clothing and drink lots of water to help cool down.
- Draw your drapes, blinds, shades and curtains (particularly on the north side of the house) which can keep heat from getting inside in the first place.
- Open the bathroom window when showering and keep the door closed to vent the heat and humidity outside, rather than back into the house.
- Turn off unnecessary heat-producing electronic appliances when you're not using them.

## **Model Features**

Look for models that have certain features that will assist in keeping you cooling like:

- Oscillation Function – models that have an oscillation feature assist in varying the air flow around a wider room area
- Variable Fan Speed – models that have variable speeds assist in moderating the air flow for better comfort control
- Wi-Fi & Smart Home Enabled – smart models can be controlled through the comfort of your own phone or via voice control
- Remotes & Timers – models that have remotes & timers assist in better managing the usage of the fan

Visit [www.goldair.com.au](http://www.goldair.com.au) for more details. Including user manuals made available for download.

# Get Smart

## Wi-Fi & Smart Home Integration

Combining modern design with innovative technology, we are leading the charge with our Smart Home seasonal products. All our Wi-Fi enabled products can be paired for free with our very own Goldair app and are Amazon Alexa and Google Home device compatible. With over 20 Goldair Wi-Fi & Smart Home enabled products to choose from, sit back, get smart and keep cool this summer.

Operate your devices conveniently from one place with our very own Goldair app. Pair your Wi-Fi enabled devices by simply downloading the Goldair app from the Apple store or Google Play. For instructions on your individual device, go to:

<https://goldair.com.au/goldair-app>

or use this handy QR code to get there.

Our app mirrors the functionality of your fan, allowing you to turn on and off, set different modes, or timer functions if they are available on your device.

### Flexibility

Add unlimited Goldair devices to your app as often as you want

### Energy Saving

Promotes energy efficiency by setting timers or schedulers on your devices

### Safety First

Our app still maintains all Goldair's high safety standards for your peace of mind

# Smart Home

## Wi-Fi & Smart Home Integration

Experience the coordination and convenience of home automation by turning your space in to a Smart Home, where your electronic devices can be operated through your Wi-Fi via your phone, or voice assistant device. From light bulbs to security cameras and of course heating and cooling products, Smart Homes are the future in providing you with security, efficiency and flexibility.

We have paired all Goldair Wi-Fi enabled devices to work with Amazon Alexa and Google Home devices, giving you flexibility to use your phone or voice to automate the Goldair devices you choose to take home to your new Smart Home World.

## We Recommend

Here at Goldair, we embrace the ever-evolving technology world working consistently on our development, engineering and testing of our products to bring the highest standard and quality of cooling devices to Australian shores. See below some of our most recommended cooling products compatible with Wi-Fi and Smart Home automation.
