

### ⚠ WARNINGS ⚠

- Risk of fire or electric shock.
- If you are unfamiliar with electrical installations, consult a qualified electrician before proceeding.
- Do not make or alter any holes in the wiring enclosure or modify any electrical componentry.
- To prevent wiring damage or abrasion, do not expose wiring to edges of sheet metal or other sharp objects.

### CAUTIONS

- To ensure personal safety, proper grounding of the electrical fixture is required.
- The fixture must be wired in accordance with the National Electric Code (N.E.C.) and applicable local codes or ordinances.
- Suitable for damp locations
- 120 VAC, 30 W, 60 Hz only

## INSTALLATION INSTRUCTIONS

1. Ensure that power has been turned off by switching the circuit breaker or by removing the fuse from the fuse panel.
2. If you are replacing an existing fixture, remove and disconnect the old fixture first.
3. Remove the orange E26 connector.
4. Using the CCT switch on the fixture, preview and select the desired color temperature.
5. Attach the mounting bracket to the junction box using the supplied mounting screws as shown in figure 2. Ensure that the supply wires go through the center hole of the bracket.
6. Connect the hot (black) wire to the black supply wire, the neutral (white) wire to the white supply wire, and the ground (green/bare copper) wire to the green using the supplied wire connectors shown in figure 3.
7. Ensure that the wires are safely tucked into the junction box and no wires are pinched.
8. Push the light up, while aligning the grooves in the body of the light with the mounting bracket. Turn the light clockwise to secure. Ensure the light has been locked into position.
9. Installation is now complete. Restore power and check operation of the light fixture.
