

# 1000ENT SCREEN MIRRORING

Screen **Mirroring** displays your phone's screen on the touchscreen of the treadmill.

1. Press the Media tab on the bottom of your console screen.
2. Press **How it Works** under Mirroring or Wired Mirroring and follow the instructions provided on the screen.
1. Scan the QR code on the screen to join the network or open WiFi settings on your phone to connect manually.
2. On your phone, run the Screen Mirroring function (the name may vary depending on your phone's OS) and select the same network to start monitoring.
3. If you have no built-in mirroring function on your phone, scan the QR code on the screen to download the EZCast app and join the network through the app.

Wired Mirroring is also an option

### iPhone

Use a Lightning to HDMI adapter and an HDMI cable to connect your phone to the machine console.

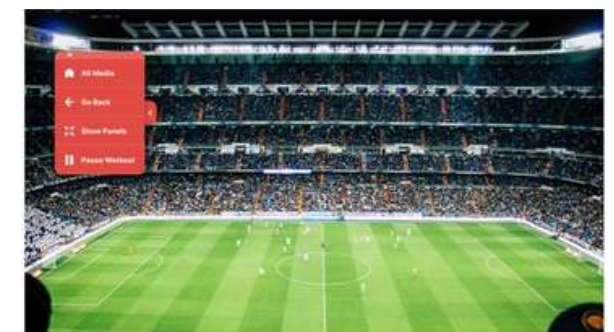

### Android

Use a USB-C to HDMI adapter and an HDMI cable, or a direct USB-C to HDMI cable to connect your phone to the machine console. Make sure your Android smartphone supports video output over USB-C.

\*The HDMI port is located in the right corner of the machine console's underside.

1. Once the content is on the screen, use the Floating Panel to navigate and pause your workout when needed.
2. Touch the panel's top edge to drag the panel around the screen to find the perfect place for it, where it will not prevent you from interacting with the content.
3. Press **Hide Panels** to enter the full screen mode without stats on the top and tabs on the bottom. Press **Show Panels** to bring them back.
4. Use the arrow button on the right side of the panel to hide and show the text labels. This allows you to further minimize the panels size.
5. Press **All Media** to go back to the content sources selection.

1. A subscription may be required to access some apps
