Tool Sanitizer

Model: 208A

This is the original instruction, please read all manual instructions carefully before operating. VEVOR reserves a clear interpretation of our user manual. The appearance of the product shall be subject to the product you received. Please forgive us that we won't inform you again if there are any technology or software updates on our product.

Symbol	Symbol Description
	<p>Warning: To reduce the risk of injury, the user must read the instructions manual carefully.</p>
	<p>This symbol, placed before a safety comment, indicates a kind of precaution, warning, or danger. Ignoring this warning may lead to an accident. To reduce the risk of injury, fire, or electrocution, please always follow the recommendation shown below.</p>
	<p>CORRECT DISPOSAL:</p> <p>This product is subject to the provision of European Directive 2012/ 19/EC. The symbol showing a wheeled bin crossed through indicates that the product requires separate refuse collection in the European Union. This applies to the product and all accessories marked with this symbol. Products marked as such may not be discarded with normal domestic waste, but must be taken to a collection point for recycling electrical and electronic devices.</p>

FCC INFORMATION

CAUTION: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment!

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- 1) This product may cause harmful interference.
- 2) This product must accept any interference received, including interference that may cause undesired operation.

WARNING: Changes or modifications to this product not expressly approved by the party responsible for compliance could void the user's authority to operate the product.

SAFETY INSTRUCTIONS

WARNING: Do not expose eyes or skin to UV light.

1. When using the sterilizer for the first time, operate it in an empty load mode for working cycle, then open the door for 20 minutes. This operation can eliminate any odd smell inside the cabinet.
2. Make sure to drain all water the utensils before placing them in the sterilizer. The utensils should not be stacked but placed vertically one by one to achieve the best sterilization effect.
3. In case of any abnormal conditions (such as unusual noise, odd smell, or smoke), immediately unplug the power cord of the sterilizer and contact the repair center or the manufacturer for inspection and repair. Do not use it again until the cause of the fault is resolved.
4. When maintaining or cleaning the device, make sure to unplug the power cord to ensure complete disconnection from the power source.
5. Wait for 10 minutes after the sterilization cycle completed before opening the door. Use the utensils only after they have cooled down to avoid affecting the sterilization effect or causing burns.
6. Do not install sterilizer near flammable materials.
7. If the power cord is damaged, it must be replaced by a professional from the manufacturer, its repair department, or similar department to avoid danger.
8. Do not place the sterilizer in areas prone to moisture or water splashes, and do not use heating appliances near the sterilizer, as this may cause deformation or malfunction of the sterilizer.
9. Special user groups (such as children) are prohibited from using this device.
10. After use, if it will not be used for a long, please cut off the power and do not leave the power cord in a connected state to avoid danger.
11. It is strictly prohibited to directly rinse the with water or immerse the machine in water.
12. The smell produced during the ultraviolet disinfection process is the smell of active oxygen, which is normal phenomenon and harmless to the human body.

MODEL AND PARAMETERS

Model	208A
Input	AC 110V 60Hz(US), AC 220-240V 50Hz(EU&AU)
Max. Power	5W
Time setting	5-60 min
Size	397*272*305mm

STRUCTURE DIAGRAM

1.Steel basket	2.Uv lamp
3.Handle	4.Tempered glass door
5.Select button	6.Work indicator light
7.Power button	

PARTS LIST

	
Tool Sanitizer x1	Steel basket x2
	
Power Cord x1	User Manual x1

OPERATION METHOD

- 1.Insert the plug to the power supply which match the sterilizer's electric voltage.
