This warranty extends only to consumers and specifically does not extend to Retailers, sellers or their agents or employees. This warranty is effective only if the product is purchased and operated in the country in which the product is purchased. A product that requires modifications or adaptations to enable it to operate in any other country than the country for which it was designed, manufactured, approved and/or authorized, or repair of products damaged by these modifications is not covered under this warranty.

This warranty does not extend to the purchase of opened, used, repaired, repackaged and/or resaled products, including but not limited to sale of such products on Internet auction sites and/or sales of such products by surplus or bulk resellers. Any and all warranties or guarantees shall immediately cease and terminate as to any products or parts thereof which are repaired, replaced, altered, or modified, without the prior express and written consent of Paris.

Learn About Your Weego OBDII 12V Memory Saver!

When you remove or disconnect the battery from your vehicle, the electronics lose their saved settings. The Weego Memory Saver allows you to change your battery without losing or resetting anything!

STOP Before Getting Started

1. Read vehicle's owner's manual: The vehicle manufacturer may have specific cautions and instructions about replacing your vehicle battery. It will also show you how to locate your vehicle's OBDII port.
2. Turn off all electronics in your vehicle (air conditioner, heat, radio, lights, chargers, etc) to prevent any damage to your Weego Memory Saver.

3. Make sure your vehicle has been off for at least 20 minutes before using your Memory Saver – this is how long it takes for your computer to fully shut down.

Ready, Get Set, Weego!

1. Connect your Memory Saver cable into your vehicle's OBDII port.

2. Connect the other end of the Memory Saver cable into the 12V/10A port on your Weego Jump Starter Battery+.

3. Power ON your Weego. You should see the Red LED Indicator Light on your Memory Saver illuminate, indicating a good connection.

4. You may now disconnect the vehicle's battery.

5. After the new battery is installed, disconnect the Memory Saver from your Weego, then disconnect the Memory Saver from your vehicle.

Warnings

1. **DO NOT** start your vehicle while your Weego is connected to your vehicle through the Memory Saver.
2. Keep your Memory Saver clean and wipe with a dry cloth after each use.
3. When you disconnect your vehicle's battery, the battery connector cables are still live, and will receive some power from your Weego. Please take caution and do not let them touch one another, or any conductive material, during that time.
