

YI Outdoor Camera 1080p Instructions

### 1. Official Configuration

Camera x 1 • Adapter x 1 • Wall anchor x 10 • Manual x 1 • Screws x 1 • Mounting plate x 1 • Clip x 1

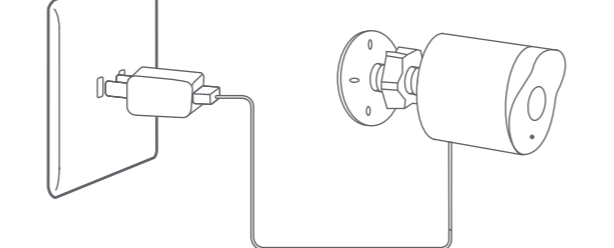

### 2. Product Configuration

Indicator light • IR light port • Speaker • Microphone • Camera lens

### 3. Basic instructions

- First of all, get your camera with your phone app.
- Before mounting camera, you need to power through to make along the wall, you should place the mark of the camera from the ruler to the camera.
- Then please to your ruler.

### 4. Download YI App

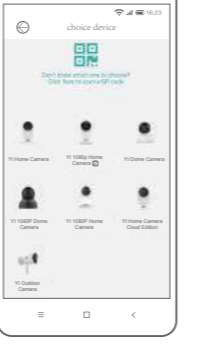

- Scan QR code to download YI app.
- Open the app and register for YI account.
- If you already have YI account, you can skip to directly. Add the camera according to prompt voice.
- Follow the instructions and please input if you needed.

YI Home App QR Code

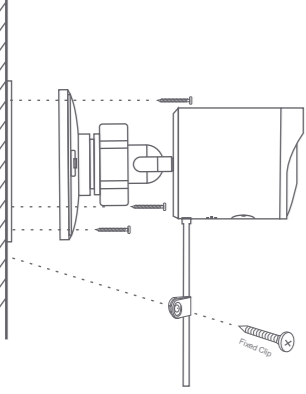

### 5. Add your camera to YI account

After you input YI app, and enter the interface of mounting device, you can in the interface of camera. Please read QR code and input "yiming@yicam.com". Then "You can scan QR code to add camera. After you read QR code and add successful, you can choose to scan the QR code. When QR code scan to successful, click "next step" to start the pairing process. After you have "pairing is successful", you can begin to use.

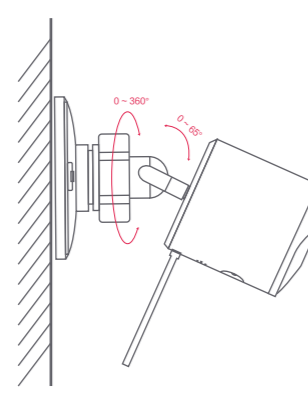

### 4. Install devices

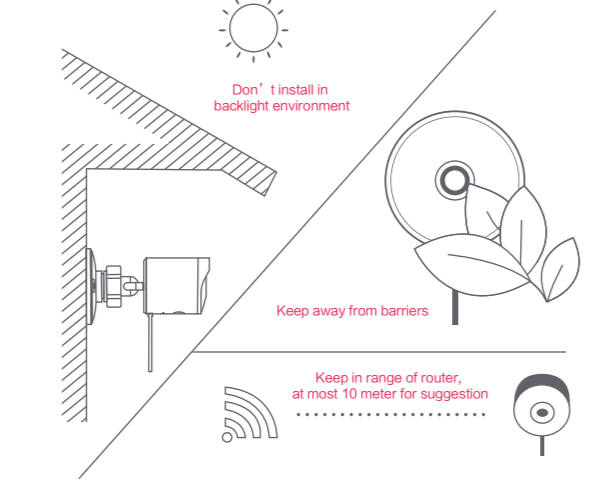

- Take camera to the camera base to test. Don't directly through the hole of installation anchors and push it under your camera. After camera base is installation anchors and push in some. To ensure the camera is mounted well, you can adjust the push to ensure the.
- Use clip to hold power cable, make it more that don't get caught for clip.

- Bring your camera to the mounting spot.
- Ensure your camera can connect to Wi-Fi in the spot.
- If you put your camera with your phone successfully before, the camera will connect to Wi-Fi automatically when powered on.
- You can prepare the installation. If you cannot use the anchors, it needs to be used. When you need to drill new anchors.
- When connecting cables, you should adjust about angle of the camera and look camera's bulb light.

### 5. Matters need attention when mounting

Don't install in back of environment • Keep away from battery • Keep in range of Wi-Fi • Avoid to work for a long time

### 6. Basic parameters

- Maximum resolution: 1080P/1080
- Lens: 110° wide-angle
- Audio: built-in microphone
- Video compression: H.264 High Profile
- Photographic resolution: 20 digital noise reduction, distortion correction
- Alarm mode: motion detection
- Waterproof grade: IP66
- Day to night conversion: IRGCT automatic switching
- Support playback resolution: 4 K (up to 30FPS 60° or user)
- Wireless encryption: WPA/WPA2/TKIP
- Length of USB cable: 3m/10ft
- Power supply: DC5V/1A

The device complies with Part 15 of the FCC Rules / Industry Canada licence-exempt RSSI. Operation is subject to the following conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may originate from another radio transmitter.

Le présent appareil est conforme aux CNR d'Industry Canada relatives aux appareils sans licence. Le fonctionnement de cet appareil est assujéti aux conditions suivantes: (1) l'appareil ne doit pas produire de brouillage, et (2) l'appareil doit accepter tout brouillage radioélectrique auquel il est assujéti, y compris le brouillage émis par les appareils voisins.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If the equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/television technician for help.

Under Industry Canada regulations, this radio transmitter may only operate within the frequency band of 2.4 GHz and 2.48 GHz. It is important to avoid gain adjustment for the transmitter by Industry Canada. To avoid potential radio interference to other users, the antenna gain and its gain should be no greater than the equivalent isotropically radiated power (EIRP) is not more than that necessary for successful communication.

Conformément de la réglementation d'Industry Canada, le présent appareil n'est autorisé à fonctionner que dans la bande de fréquence de 2,4 GHz à 2,48 GHz. Il est important d'éviter tout ajustement de gain pour l'émission de l'émission radio. Afin de prévenir toute interférence radio à d'autres utilisateurs, le gain de l'émission et son gain doivent être inférieurs ou égaux à la puissance isotrope rayonnée équivalente (PIRE) n'est pas plus que ce qui est nécessaire pour une communication réussie.

**FCC Requirements**

To satisfy FCC Part 15B RF exposure requirements, a separation distance of 20 cm (8 inch) must be maintained between the antenna of this device and persons during normal operation. To ensure compliance, operators of this device should maintain the distance as not recommended.

1083-001 v1.0

CE FCC (Class B) VCCI (Class B)

Thank you for choosing the YI Outdoor Home Camera, please read the instructions carefully before using the product and keep it good condition.
